T&J Granite Countertops specializes in custom Granite Kitchen Countertops for your home or business. Whether you are remodeling or involved with new construction, granite countertops will make a beautiful addition and increase the resale value of your home. Granite has become the countertop of choice for today's luxury living for your home or office. Available in over 100 different colors, custom granite countertops can be matched with any decor.

Call today to schedule an appointment 706-283-8009

T&J Granite Countertops has one of the most modern countertop fabricating shops in North Georgia and can handle any commercial countertop requirement you may have. If you are a contractor in need of a countertop fabricating company, we can handle any size job. We have the state of the art CNC machinery required to do large commercial buildings, complete subdivisions, university housing projects, hotels and other developments.

T&J Granite Countertops has been fabricating custom granite countertops since 1997. **Choose from over 100 colors of granite** countertops and styles of granite. We will be happy to escort you through the granite slab warehouse and choose the exact slabs your countertops will be made from. **New colors are arriving weekly** like Black Lumiere, Golden Ray, Juparana Cappuccino, Uba Tuba, New Venetian Gold, Blue Persia, Golden Passion, Creme Espresso and other beautiful colors. Our highly trained consultants and technicians carefully plan and fabricate your granite countertops to your specifications to ensure your complete satisfaction.

Proper Sink Installation - T&J Granite Countertops takes no shortcuts when mounting sinks to granite countertops. We do not just glue the sink to the bottom of the countertop like many companies do, but professionally install your sink using steel clip mounts, securing the sink, and allowing you to easily remove the sink if necessary for plumbing problems, or to change the sink at a later date.

IceStone durable surfaces are made of recycled glass and cement and is one of the most environmentally safe products you can use for home building. It is strong like granite, not as porous as marble and heat-resistant like stone. The chemical composition is benign and 99.5% inorganic, making it a very safe material from the standpoint of toxicity and fire resistance. The fabrication, installation and maintenance of IceStone surfaces follow essentially the same process as used with natural stone. IceStone has adopted goals for energy conservation, carbon emissions, water use, and waste management. IceStone will become carbon-neutral, purchase renewable energy credits, and will continue to reduce energy use per square foot of product produced. **IceStone materials can be used towards LEED points. GO GREEN!**

T&J Granite Countertops fabricates and installs **Granite Countertops, Quartz Countertops Dupont Zodiaq, CaesarStone, SileStone, IceStone Countertops** for Atlanta, Athens, Augusta, Greenville, Anderson, Cashiers, Asheville, Brevard, Hendersonville, Lake Toxaway, and Highlands, and other cities in **North Georgia, Southeast North Carolina, and South Carolina**. We also are dealers for Levi sinks, Blanco sinks, granite cleaners and sealers. We provide quartz and granite countertop installation in residential and commercial buildings for new construction or kitchen remodeling. Thank you for choosing T&J Granite Countertops!

T&J Quartz Countertops

Looking for countertops that really POP! Quartz has modern colors as well as the granite look-alike colors and patterns, and many advantages over granite. Quartz has bright colors, is virtually seamless, light weight, almost indestructible, and worry free. This manufacturing process uses raw quartz crystals ranging in size from coarse grains to the size of rock salt. Once the quartz is ground and selected, the crystals are combined with bonding agents (resin) and color, then heated and vibro-compacted to form an impenetrable surface. The resulting slabs are a matrix of 93% quartz and 7% resin binders and pigments ... free of fissures and cracks, and impervious to water, moisture, or bacteria. **Choose from Dupont Zodiaq, CaesarStone or SileStone** for countertops that fit your modern lifestyle.

Dupont Zodiaq is an advanced composite material made of 93% quartz, a DuPont proprietary binding polymer and pigments developed for one purpose: to create a new material with its own depth, character and a unique aesthetic, suggesting a sense of enlightened luxury and an attitude of bold sophistication. With a cool, fresh, sparkling look, Zodiaq catches and reflects light, capturing the radiance of quartz crystal. Zodiaq also has unusual clarity and consistency of color, qualities that offer great potential for both horizontal and vertical applications. Zodiaq is the original quartz surface material made by DuPont. Zodiaq can withstand exposure to normal cooking temperatures from pots, pans and dishes without being damaged, has a **ten-year warranty**.

CaesarStone Quartz Surfaces had the revolutionary idea of using quartz - one of nature's hardest materials - to create a brand new surfacing product in 1987. Superior to other manufactured and stone surfaces, CaesarStones' extraordinary physical properties soon became internationally recognized, establishing a new product genre in the industry. Today, CaesarStone offers two products - CaesarStone - the original quartz stone surfacing material and Concetto - the stone surface made from individually cut semi-precious stones. CaesarStone is the original quartz-based engineered stone primarily used for kitchen countertops and bathroom vanities. **CaesarStone has Good Housekeeping seal of approval, and carries a Lifetime Warranty.**

SileStone is natural quartz created for today's homes. Utilizing a revolutionary process, Silestone offers you over 60 colors, exceptional textures and variety of finishes. Also, multi-dimensional functionality makes Silestone quartz a cleaner, safer surface for your home. SileStone offers the unique combination of built-in **Microban antimicrobial product protection**, National Sanitation Foundation certification and **GREENGUARD indoor air quality certification**. Microban protection inhibits the growth of microbes such as odor-causing bacteria, mold and mildew. **Silestone carries a fifteen-year warranty.**
